

FIFTY KILLED; FIFTY INJURED IN DYNAMITE EXPLOSION

British Steamer "Alum Chine" Was
Wrecked When Dynamite for
Use in the Panama Canal
Explodes

Baltimore March 7.—It is believed that at least fifty were killed and an equal number injured by the explosion of more than 300 tons of dynamite while it was being transferred to the steamer Alum Chine, in the lower harbor this morning.

Many of its victims were members of crews of vessels anchored near by.

Earlier Reports of Disaster

Baltimore March 7.—The British steamer Alum Chine, while unloading dynamite for use in the Panama Canal, was wrecked by an explosion followed by fire this morning in the lower harbor. According to police four men were killed and twenty five injured.

A barge along side the steamer, with 340 tons of dynamite, was completely destroyed.

The force of the explosion swept away the upper works of the United States naval collier Jason, killing three men and injuring twenty nine others. The Jason was about 700 feet away at the time she had just been completed and was soon to have her governmental trial trip.

Six members of the crew of the tug Atlantic, lying alongside the Alum Chine, were killed and the tug was practically destroyed.

Latest reports place the dead at twenty and the injured at forty.

Forty steerbores are unaccounted for. If they were on the steamer or it is certain that they perished.

The tremendous explosion shook the country for miles around. Windows were broken and chimneys knocked down a dozen miles from the scene. At Sparrow's Point, a school house was partially wrecked and several children were hurt.

Baltimore was shaken as if by an earthquake and tall buildings in the center of the city were rocked by the shock.

Scores of vessels hurried to the scene of the explosion. Floating bodies were drawn from the water and thirty or more injured were taken to Baltimore hospitals.

Stevedores were busy loading the steamer when a puff of smoke came from the vessel's hold. One of the crew noticed it and ran screaming to dock followed by as many as had time to escape.

In a few minutes hundreds of tons of the explosive lot got with a deafening roar columns of flames shot

from every portion of the vessel and the air was filled with flying fragments. Portions of the vessel weighing tons shot hundreds of feet into the air.

MAYOR OF PHOENIX CITY GIVEN PRISON SENTENCE

Accused of Being Accessory Before the Fact to Assault on Young Girl
Columbus Ga. March 7.—Clund B. Gullitt, Mayor of Phoenix City, Ala. was today sentenced to serve one year on the State farm at Milledgeville Ga. having been convicted of the charge of being accessory before the fact to assault with intent to murder Italy Osborne, aged 19.

Gullitt was convicted two days ago on the charge with recommendation of the court. Motion for a new trial had been made.

Bill Jenkins, a negro indicted on the same charge, was today convicted and given a similar sentence. He takes no appeal.

"Tom" Pace is still to be tried at the next term of court.

Dr. W. J. Whitehead has been convicted and given a life sentence for committing the assault with intent to murder the girl.

LESSON TEXT

12 And the men said unto Lot, Hast thou here any besides? son in law and thy sons and thy daughters and whatsoever thou hast in this city bring them out of this place.

13 For we will destroy this place because the cry of them is waxen great before the face of the Lord; and the Lord hath sent us to destroy it.

14 And Lot went out and spake unto his sons in law which married his daughters and said, Up get you out of this place; for the Lord will destroy this city. But he would as one that mocked unto his sons in law.

15 And when the morning arose then the angels hastened Lot, saying, Arise, take thy wife and thy two daughters which are here; lest thou be consumed in the iniquity of the city.

16 And while he lingered, the men laid hold upon his hand and upon the hand of his wife and upon the hand of his two daughters; the Lord being merciful unto him, and they brought him forth and set him without the city.

17 And it came to pass when they had brought them forth abroad that he said, Escape for thy life; look not behind thee; neither stay thou in all the plain; escape to the mountain lest thou be consumed.

21 The sun was risen upon the earth when Lot entered into Sodom. 24 Then the Lord rained upon Sodom and upon Gomorrah brimstone and fire from the Lord out of heaven.

25 And he overthrew those cities and all the plain and all the inhabitants of the cities and that which grew upon the ground.

26 But his wife looked back from behind him and she became a pillar of salt.

27 And Abraham gat up early in the morning to the place where he stood before the Lord.

5 And he overthrew those cities and Gomorrah and toward all the land of the plain and toward all the land of the mountains west up as the smoke of a furnace.

28 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

29 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

30 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

31 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

32 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

33 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

34 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

35 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

36 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

37 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

38 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

39 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

40 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

41 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

42 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

43 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

44 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

45 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

46 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

47 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

48 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

49 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

50 And it came to pass when God destroyed the cities of the plain that God remembered Abraham and said Lot out of the midst of the overthrow when he overthrew the cities in the which Lot dwelt.

President Wilson Will Send Mobile
His Nomination to the
Senate Sometime in the
Near Future.

Washington March 7.—The tip here tonight is that General Bibb Graves of Montgomery is likely to be appointed Assistant Secretary of War. Developments today certain.

y pointed that way and unless there is a change in the situation within a few days Alabama people need not be surprised to hear that their former Adjutant General has been called upon by the administration to fill this very important place.

It will interest democrats of Alabama and other Southern states to learn that on high authority it can be stated that outside of what may be classed as emergency cases, or those absolutely necessary to displace of so that the Government machinery can be kept going, President Wilson will not countenance the announcement of other appointments until after the meeting of the special session of Congress on April 3. Then the President will be ready to act.

On account of the order issued from the White House in reference to applications for places the impression has gone out that the president will not consult state delegations. That is erroneous. He is understood to have assured some of his Congressmen that he desires to consult state delegations and wants their recommendations concerning the major appointments in their respective states but this does not mean he wishes to consult them regarding postmasters and the like.

President Wilson will send to the Senate probably on Monday, the nomination of Peter J. Hamilton, of Mobile to be United States Judge in Porto Rico and he will be promptly confirmed. The position pays \$8,000 a year.

In the contest for Chaplain of the Senate today, Dr. Stephenson, well known among Alabama Baptists, ran second in the race, although Dr. Prentiss, a well known Southern Methodist minister was nominated.

Dr. Stephenson was warmly supported by Senator Johnston.

The Senate Democrats made slow progress in their caucus today for the reason that it early developed that there was a feeling among Northern and Western Democrats that as much as the South is going to have the bulk of the greater committee chairmanships the officers of Secretary and Sergeant-at-Arms of the Senate should go to the North and West. This had a tendency to not only delay things but also had the effect of smashing states that might otherwise have gone through.

Judge and Mrs. Herring of Enterprise Ala., were among the callers upon Secretaries Bryan and Daniels today. They also visited the White House.

PUTS THE MANURE SPREADER FIRST.

No farmer who has ever owned or used a manure spreader can have any adequate idea of its real value or what a luxury, so to speak, it is to own and operate one of these machines. With a spreader it is so easy to haul out the manure and spread the same very evenly all over the field, and to do so when it ought to be done as fast as it is made and a load accumulates and there is a field ready to receive it. I think more about the value of a farmyard manure and it helps me to conserve and to accumulate more of it than it did before I got a spreader. Furthermore, manure can be made to go twice as far, and will go twice as much good as that spread by hand with a fork.

WHY THE HIGH COST OF LIVING

By Hon. Arthur Capner, Popchi-
Kaiser, Publisher of the Capner
Publications.

I have been in very close touch
with the farmers of Kansas and the
Southwest for more than 25 years.
I have seen many bumper crops
come into the harvest and an im-
mense result of these crops from the
fact that they have the farm with the
go into the home of the consumer
and all too many times have I
seen the price received by the pro-
ducer double, triple, quadruple and
more by the time the product had
found its way to the consumer.

The farmer did not realize the
percentage of net profits to which
he was entitled and the consumer's
money did not buy the quantity and
quality that it should have bought if
first cost had been considered. In
fact, the retail price of farm prod-
ucts as it is in all other lines.

This tenfold price increase is
without reason without justification.
There are too many profit
takers or somebody taking too
much profit somewhere along the
line of distribution and the alarm-
ing increase in the cost of living
which has come is a natural result
furnished all the evidence that
should be necessary to prove it. I
high time that some co-operative
method of distribution be worked
out that will link the farmer
to the consumer.

When the right plan or method is
found it will undoubtedly do more
than all else has ever been thought
of or devised as a means of cutting
the consumer cost on food stuffs.
And while such co-operative plans
of distribution will undoubtedly put
the products of the farm into the
hands of the consumers as a very
great saving to the consumer, it
would also bring to the American
farmer a tremendous increase in
the profits now realized from his in-
vestment of money. This and its
bar—on income that positively
must come if the agricultural devel-
opment of our country is to be car-
ried forward in the manner and to
the extent that the growth of the
country in other ways demands.

For all these reasons I am in
heartily sympathy with the move-
ment being initiated by the con-
sumers leading farm paper pub-
lishers for the creating of a permanent
organization for work in this direc-
tion during the First National Con-
ference on Marketing and Farm
Credits which is to hold in Chi-
go April 24th, 25th and 26th. The
United States Department of Agri-
culture will undoubtedly see the
need of establishing a permanent
Bureau of Marketing and carry
forward the work that will be start-
ed at the Chicago conference.

GRANGE MIXTURE

Is The Best It Is Possible To Produce

In every industry, there are firms who lack the originality and the business foresight of selling
their goods through good constructive argument. They believe, apparently, so little in the supe-
rior merit of their own productions that they resort to fault-finding with their competitor's wares.

Luck is Largely a Matter of YOU! We had a man come to us the other day wanting some Ni-
trate of Soda to put out right now. We believe in letting a customer decide for himself what sort
of fertilizer materials he should use, but we intimated that he should use Grange Mixture for the first
application, and then later on, if he found his crop needed it, he might put on an application of quick
acting nitrate. This did not suit him; his idea, he said, was to use the nitrate now and let it push
his cotton crop forward so he wouldn't have to work it!

If he follows that plan, when he goes to gather his crop next fall—Luck is going to be against
him! The more fertilizer you put under your crop, the more you ought to work it. Isn't it fool-
ishness to raise 500 pounds of seed cotton to the acre when you might raise twice as much? Just
as much for gathering, just as much for seed, whether you raise ten bushels of corn to the acre or
twenty. When David Dickson died, he left a Million Dollars. He made it farming in Georgia.
He was the first Southern farmer to make that much money farming. When David Dickson was
told that he spent too much money buying fertilizers, his answer was: "I don't mind spending a
dollar, when I can get back a dollar and a quarter, or a dollar and a half for it."

Farmers who stop to think about the brand of guano they buy—save a lot of money on it. Of
course you pay for the fertilizer and pay for putting it on. Bad or good it costs money. The
other day a merchant who sells nearly a thousand tons of fertilizers every year—not the Dothan
Guano Co's brands—bought fifty tons of Grange Mixture to put out on his own farms. It cost
him more money than the other kind. People call him a skin flint. We don't believe it; he sim-
ply knows what will pay him best to use, and he pays the price for it and uses it.

The Autobiography of a Fly Told in Simple Fly Language

Got On in the World, Although His
Success Cost Many Kind Hu-
man Persons Their Lives.

At Home with the Joneses
As soon as I became a fly I stretched my wings and flew into a house near by. Some other houses in the neighborhood had sermons in the windows, but this was the home of the same kind Mr. Jones and he seemed to like us flies, because he had no screens. Coming directly from the stable, I know my feet were not very clean, but I wiped them as soon as I could in the sugar bowl and on little Johnnie Jones' bread and butter. I was surprised when I crawled over kind Mr. Jones' bald head and he swatted at me with his hand. I hurried out of the window and spent some time in a waddy gutter, and then flew in the room again and wiped my feet on Mr. Jones' head. He swatted at me some more times and I thought it was some sort of a game so I got four or five other fly kids and we had a great time skating over the man's head and face. Finally my little brother

or Peely Fly who had been col-
lecting disease germs at the end
of a drain pipe in the house next
door fell into Mr. Jones' coffee
Peezy Fly told me afterward that
a lady next door to Mr. Jones had
typhoid fever so I was not surpris-
ed when the doctors came to the
house a few days later and said that
Mr. Jones had the same disease.
I was a little bit sorry when he
died because he had been so good
to us when we were babies.
As soon as I was old enough to
fly I married and ten days later I
was the father of 120 fly children.
We do not believe in race suicide,
you know, and within a month I was
grandfather to 22,579 fly babies.
No Mr. Roosevelt did not send me
a letter. Some of my brothers had
even larger families.

POLICEMAN AND ENGINEER HAVE SCRAP IN BIRMINGHAM

Birmingham, Ala., March 7.—A
shooting in the corridors of the
fourth story of the court house, a
bout 2 o'clock this afternoon, caus-
ed considerable consternation in the
temple of justice though injuries in-
flicted will not prove serious.
Ed Parker, a former policeman
of Birmingham, was shot and pain-
fully wounded by W. J. Jones, an
engineer on the Alabama Great
Southern Railroad. The two men
quarrelled over a petty matter, Jones
having been to the home of Par-

place. I suffered with terrible pains in
my back and head. I had a yellow
complexion and my face was covered
with pimples. Our family doctor only
gave me temporary relief.
A friend of mine advised me to try
Cardui so I began taking it at once,
and with the best results for I was
cured after taking two bottles. My

The number of those that have been put to death is very large. Oh, yes, some thousands. But plenty more remain. There have ever been out of reach and that reminds me of my grand old friend. I think it is entirely his own doing.

You do not seem very glad. I confess the task is unpleasant. I am a soldier and I do not like to hunt out old men and old children for the executioner. I am a soldier and I do not like to hunt out old men and old children for the executioner.

VALUE OF THE SPEECH

I had a good heavy nine blade
silk cutter a great piece of my
churn. I use my cutter in the fall
for cutting both corn and cotton
stalks in preparing my land for
wheat and oats. I cut my stalks
six inches and they cut more quick
than to pull them under which
and then the broadcasted more
easily over the land. The cut does
more work in the cotton field in the
spring when the stalks have been
cut in the open furrow in the fall
for the seed is all gathered
in.
In cutting stalks they should be
dry to get the best results. In cut-
ting up our stalks you have a

lot of vegetable matter in a quick
decay, for upon your land you
can work your corn land in cotton
with it lying, both with the
stalks. If your stalks were cut
in the fall when corn is planted
in the fall, the soil will do it
will be a great help to the soil
in the fall.

Using my cutter to the shed in
night and I live in old brick broom
and brush all dirt and trash from
the machine and oil and grease all
working parts. I take notice every
morning, to see that all parts are
perfectly tight and are taking to the
fall.

Our new and a pair of mules can
cut six acres of 1 1/2 foot cotton
in ten hours of 2 foot corn
in a day of ten hours.

I claim that a silk cutter is a
great labor saver as well as a land
improver because of the manner in
which it leaves the corn and cotton
stalks. O. C. Linton in the Pro-
gressive Farmer

MUST HANG PERFECTLY EVEN

Proper Length of the Present Short
Skirt Apt to Cause Trouble for
the Home Dressmaker.

Now that short skirts are the cor-
rect and fashionable thing to wear it
is most important that the bottom of
the skirt shall hang perfectly even
the same distance from the floor at
every point.

Home dressmakers will find this a
somewhat difficult task if they are at-
tempting to fit the skirt upon them-
selves. When making a skirt finish it
completely excepting for the hem,
then slip the skirt on and hook it in
place around the waist. Now take a
yardstick place one end on the floor
pressing it against the skirt, then at
the top where the stick touches the
skirt make a faint mark with a
piece of tailor's chalk. Repeat this
all around the skirt and from these
points measure toward the hem mark-
ing it the length you desire. You can
then turn the hem up at these marks
and be sure that it is exactly even at
the bottom. Walking skirts should
be three inches from the floor out-
ing skirts four inches and those for
indoor wear an inch and a half.

Another way to mark the length of
a skirt but one which requires the
aid of another person is to take a
flat piece of cardboard or a ruler and
mark on it the distance the edge of
the skirt is to be from the floor when
finished. Place the skirt on the
wearer and move the ruler around the
skirt placing pins at intervals where
the mark shows the length wished.
Turn the hem up at this point all
around.

A rail gauge that can be bought at
any department store for a small sum
is fast with a piece of tailor's chalk
fixed on a rod in such a manner that
it can be lowered or raised to any
length you wish. By placing this on
the floor the skirt can be marked
evenly as the wearer turns slowly
around.

The nearer Easter approaches the more your thoughts must turn to the Easter Bonnet.

A Knox hat, a Fisk hat, a Gage hat, a Castle hat, may cost more than an ordinary hat, but the Artisan must be paid according to his skill in all the walks of life.

All of the above hats are in our Millinery Department, and many, many others. Our store does not aspire to be the cheap store of our section.

We handle nothing but merchandise of recognized worth; we want the reputation of being the quality store. Gracefulness, ease of manner come from the satisfaction of being correctly dressed.

Is not the insurance of this feeling worth the little more that it might cost? Our guarantee is that the same article can be bought as cheap here as at any store in America. We invite your patronage. One price to everybody.

"HAYING EYES THEY SEE NOT"

They whizzed past in their motor—
Over the hills and away
Chasing after beauty
For many and many a day

The wonderful sights of Europe
And all the Old World things
Laces and silks and drapery
And gold and diamond rings

And right by the highway I found it
Where they had passed it in
A wonderfully fashioned gown—
Blue as the summer sky

Such a delicate coloring,
Such a sweet perfume,
A child of the rain and sunshine
Born on a day in June

With only a day for a lifetime,
And yet in all this land
Not your gifted woman

Could bring to life its color
Or copy the wondrous art
Or make the gleaming dewdrop
That lives in its golden hair

There is a world of marvellous beauty
All about you and me—
Handwork of the great Creator
If we could only see

lot of vegetable matter in a quick
it is going for your land. You
can't wait your corn land in cotton
without being bothered with the
weeds. If you're also were not
in a hurry to plant corn is planted
in a hole in the dirt as it is to be
it will be next to impossible to
it will.

I find my cutter to the shed at
night and I have an old stick broom
and brush all dirt and trash from
the machine and oil and grease all
working parts. I take notice every
morning, to see that all parts are
properly tight. I am taking to the
field.

One inch and a pair of mules can
cut six acres of 12 foot cotton
rows in ten acres of 5 foot corn
rows in 15 of ten hours.

I find that a stalk cutter is a
great labor saver as well as a hand
cutter. I found the number in

MUST HANG PERFECTLY EVEN

Proper Length of the Present Short
Skirt Apt to Cause Trouble for
the Home Dressmaker.

Now that short skirts are the cor-
rect and fashionable thing to wear it
is most important that the bottom of
the skirt shall hang perfectly even
the same distance from the floor at
every point.

Home dressmakers will find this a
somewhat difficult task if they are at-
tempting to fit the skirt upon them-
selves. When making a skirt finish it
completely excepting for the hem
then slip the skirt on and hook it in
place around the waist. Now take a
yardstick place one end on the floor
pressing it against the skirt then at
the top where the stick touches the
skirt make a faint mark with a
piece of tailor's chalk. Repeat this
all around the skirt and from these
points measure toward the hem mark-
ing it the length you desire. You can
then turn the hem up at these marks
and be sure that it is exactly even at
the bottom. Walking skirts should
be three inches from the floor cut-
ting skirts four inches and those for
indoor wear an inch and a half.

Another way to mark the length of
a skirt but one which requires the
aid of another person is to take a
flat piece of cardboard or a ruler and
mark on it the distance the edge of
the skirt is to be from the floor when
finished. Place the skirt on the
weaver and move the ruler around the
skirt placing pins at intervals where
the mark shows the length wished.
Turn the hem up at this point all
around.

A fast gauge that can be bought at
any department store for a small sum
is fitted with a piece of tailor's chalk
fixed on a rod in such a manner that
it can be lowered or raised to any
length you wish. By placing this on
the floor the skirt can be marked
evenly as the wearer turns slowly
around.

I had a good heavy nine blade
still cutter a great piece of ma-
chinery. I use my cutter in the fall
for cutting both corn and cotton
stalks in preparing my land for
wheat and oats. I can cut my stalks
six inches and they rot more quick-
ly than to plow them under whole
and then are broadcast more ex-
pensive over the land. The cutter does
nice work in the cotton field in the
spring, where oats have been sown
in the open furrow in the fall
before the cotton was all gathered
in.

night. The general admission will

No doubt the best entertainment
of its kind ever given in Towhee
was enjoyed by a large audience Mon-
day evening at the High School au-
ditorium. The DeRoy's Male Quar-
tette is a fine concert company and
we cannot say too much in their
praise.

Their program was given in
three parts the first part being a
number of quartette selections and
songs the second a musical sketch
written by Mr. Loote one of the
quartette which was full of fun
and laughter and the third part
consisting of the old southern songs.
The latter were sung with feeling
and the harmony and beauty of the
old southern songs which will never
be surpassed were skillfully in-
terpreted by the DeRoy's. Their
voices blended and the solo work
was very good. The musical sketch
of the old Suwanee river by one of
